This game is still in early production... and it shows. There are bugs to work out, sure. I think the premise of the game is neat and I was willing to buy the game now to throw the devs some cash to make it better... and we shall see how it turns out.. Hold off on this one, game seems incomplete. If you want to see why check out my first game play here. <https://youtu.be/mEbdBkcPVfM>. nothing works at all you cant even chop trees. No where near ready for play. Wait on this title. The only survival to this game is from the boredom.. <https://www.youtube.com/watch?v=TnHaUIsFVtM>  
The most disapointing game i've played in a long time. nothing works. the character controls as if he's locked on rails and has a response time of almost half a second. Don't waste your time playing this game. I've already done it for you.
