Definitely what I was hoping for!

It's got enough variety where, if you get a bit creative with the Rate you play them, you can use these for a wide variety of genres! Lots of sound and music files. I got it on a 30% sale, and honestly I think paying full price would probably still be worth it, especially if you work with this program a lot.

It's unfortunate it can't be legally used with RPG Maker unless you own the RPG Maker rites to these songs, but, fromt what I understand, this does grant a commercial liscence for Visual Novel Maker -- meaning, if I'm correct, you can sell VN Maker games that contain this music. Definitely look into it to confirm.

Which, yeah, that's all I needed!

9.5V10! Really beautiful music! It's gonna be awesome to use!. I had thought that due to the fact the title said "Music" that most, if not all the tracks were going to be in fact music. There's only 40 songs, and the rest seem to be quick little 2-6 second sound effects.

I can definitely appreciate sound effects though, and I can see ways that the BGM's can be applied in my current VN. Overall, I'd say it was a pretty decent purchase.. At the very least it adds some BGM muisc to your project. The default engine has very little.
